Julie Dion

Senior UI Developer | Front-End, UX/UI Design

Capital Region, NY • juliedion1@gmail.com • 518-892-7495 • https://www.linkedin.com/in/dion-julie/ • juliedion.com

Profile Summary

• **Senior UI Developer** with **20**+ years building enterprise design systems, **AEM**-authored web experiences, and responsive front-end interfaces for brands including ***Charter Spectrum*** and ***Merck Millipore***.

• **Product Design expert,** rooted in print and digital design and grown into **UX/UI,** pairing **visual judgment** with ownership of **design systems**, **component libraries**, **prototypes**, **user research**, and **A/B testing**.

• **Front-end** developer hand-coding **responsive** and **accessible markup**, building and authoring **component**-based pages in enterprise **CMS**, **testing** across **browsers** and **devices**, and bridging design and development.

• Broad toolkit covering design and prototyping (***Figma***, **Axure RP**, **Adobe XD**), **CMS** platforms (**AEM**, ***WordPress***, ***Webflow***, ***Shopify***), front-end code (**HTML**, **CSS**), and testing (***Optimizely***, ***JIRA***).

• Engaged collaborator, working closely with ***product managers***, ***engineers***, and ***clinical or marketing stakeholders*** to align priorities and move work from concept to launch on tight timelines.

• Technical **leader**, **mentoring** designers in design systems and **AEM** authoring while owning component standards, and staying hands-on and available when the team needs support.

Technical Skills

UX/UI & Product Design: Figma, Axure RP, Adobe XD, Design Systems, Component Libraries, Wireframing, Interactive Prototyping, Information Architecture, User Flows
Front-End Development: HTML5, CSS3, Responsive Web Design, Mobile-First Development, Flexbox, CSS Grid, Cross-Browser Compatibility, Accessibility / WCAG
CMS & Web Platforms: Adobe Experience Manager (AEM), AEM Sites, AEM Authoring, AEM Components, AEM Templates, Experience Fragments, Content Fragments, Adobe DAM, WordPress, Drupal, Shopify
UX Research & Testing: UX Research, Usability Testing, A/B Testing, Optimizely, Google Optimize, Design QA
QA & Performance: QA / Regression Testing, Web Performance & Optimization, Browser Developer Tools
AI & Emerging Technology: ChatGPT, Claude / Claude Code, GitHub Copilot, Cursor, Adobe Firefly, Figma AI, Generative AI, Prompt Engineering, AI Agents, Workflow Automation
Development Tools: Git, GitHub, Visual Studio Code, Jira, Bug Tracking
Agile & Collaboration: Agile / Scrum, Sprint Planning, Cross-Functional Development
Motion & Multimedia: Adobe After Effects, Adobe Premiere Pro, Lottie Animation, Motion Graphics

Work Experience

Inspired Thinking Group (ITG) — Senior UI Developer & Product Designer

Stamford, CT (Remote) • May 2021 - Present

• Owned a cross-platform design system for ***Charter Spectrum***, building reusable component **libraries** that standardized iconography, typography, and interaction patterns across mobile and residential web teams.

UI & UX design

• Managed ***Figma*** design workflow end to end, from component design using auto layout, variants and properties and interactive prototyping with **Smart Animate** transitions and interactive components to structured stakeholder review and sign-off, therefore securing first-pass sign-off on most designs.

• Integrated **A/B** tests of **CTA** placement, competing ***Figma*** variants, moderated usability sessions, and unmoderated **Maze** tests into the design cycle, validating interface decisions before development and increasing task success rate.

• Structured **AEM DAM** assets and metadata with folder taxonomy, naming, and tagging, and created reusable Experience Fragments across **Spectrum** mobile and residential web properties with per-channel **XF** variations and editable templates, centralizing shared content blocks so a single update propagated to multiple referencing pages.

• Reviewed post-launch performance via **GA4** events and heatmaps, partnered with developers on bug fixes, and turned findings into layout and **CTA** revisions, feeding results into the design system and boosting engagement on key pages.

• Shipped ***NewPoint***'s website and promotional video from brief to launch, guiding **UX** strategy with heuristic audits, user flows, sitemap design, typographic scale, and spacing grid while producing multimedia, increasing site conversion.

UI Development

• Coded inline **HTML** and **CSS** with **RTE** source-edit mode and **HTL** component markup inside **AEM** components and authored pages, using **Flexbox**, **CSS Grid**, and wrapper-class scoping to control layout, spacing, and typography, matching approved design specs and removing multiple engineering handoff tickets per release.

• Adjusted responsive behavior across breakpoints for **Spectrum** mobile and residential web using mobile first media queries and relative units, aligning markup and styles with **AEM Layout Container** breakpoints and per device column spans, preserving page layout and hierarchy across screen sizes and improving **Lighthouse** mobile score.

• Verified **AEM**-authored **Spectrum** pages across author, preview, and publish views in **Chrome**, **Safari** and **Edge** on desktop, mobile, and real devices, checking layout, typography, and component rendering per breakpoint via device emulation and computed-style inspection in **DevTools**, correcting inline **HTML** and **CSS** to catch most visual regressions.

• Built **WCAG 2.1 AA** compliance into **Spectrum** components and authored pages, checking work with axe **DevTools** scans and keyboard-only walkthroughs and correcting contrast ratios and **ARIA** labels before publish.

Leadership & Collaboration

• Collaborated within a **cross-functional team** of ***designers***, ***developers***, and ***producers*** across ***Spectrum Business***, ***Spectrum Residential***, ***Spectrum Mobile***, and enterprise experiences, running design critiques, sprint planning, and handoff reviews.

• Mentored **a team of *designers*** and ***developers*** in design systems governance, **AEM** authoring, and **HTML** and **CSS**, using **code review** and shared **documentation** to improve delivery consistency and speed onboarding across product lines.

• Rolled **AI**-assisted design workflows into daily team practice after piloting low-risk project trials and socializing in design critiques, pairing them with design and build routines via a shared prompt library and when-to-use one-pager to speed concept iteration and pre-production layout and content review, cutting concept-to-review turnaround to fewer hours.

• Presented design system governance, **A/B** testing results, and **AI**-assisted design workflows, using interactive ***Figma*** prototypes, component libraries, and data visualizations to drive stakeholder sign-off on interface decisions.

Human Care Systems — Lead Product Designer

Boston, MA (Remote) • Jan. 2015 - Apr. 2021

• Built the ***Resilix*** telenursing platform's end-to-end design system from scratch on a scalable, reusable component library, earning the **2019 *Graphic Design USA Health & Wellness*** interactive award for **product design** and **UX/UI.**

• Unified the ***Resilix*** telenursing product with interaction patterns, triage queue flows, documented component states, and a cohesive design language with semantic status tokens and type scale, ultimately driving **$1.26M** in sales by **Q3**.

• Conducted contextual inquiry and shadowing with clinical staff and nurses, translating frontline observations into product decisions through affinity mapping and journey maps, shaping core workflows and **IA**, and increasing task success rate.

Monet/Madison Handbags — Marketing/Creative Director

Albany, NY • Aug. 2013 - Jan. 2015

• Drove rebranding on a competitive audit and consumer segmentation, repositioning ***Monet/Madison Handbags*** via wordmark development and a brand style guide after a company-wide trademark transition.

Merck Millipore — Senior Graphic Designer

Billerica, MA • May 2008 - Jul. 2013

• Designed targeted ad campaigns for ***Science Magazine***, ***Nature Magazine***, and the ***Boston Business Journal***, winning interactive and print media design awards **5** consecutive years.

Pyxis Communications — Art Director

Boston, MA (Remote) • Aug 2021 - May 2024

Air Line Pilots Association — Sr. Graphic Designer

Herndon, VA • May 2011 - Jun. 2013

Airlines Reporting Corporation — Sr. Graphic Designer

Arlington, VA • Aug. 2007 - May 2011

Education

New Horizons Certificate in Graphic Design — Washington, DC • Aug. 2007 - Apr. 2009

College of St. Rose B. A. in Communications — Albany, NY • Aug. 1996 - May 2000

Awards & Recognition

20 Most Outstanding Women of the Capital Region • 2024 | MarCom Awards — Halo Labs Butterfly Campaign • 2022
Graphic Design USA — UX/UI, Web & Print • 2010, 2012, 2019 | HOW Design / In HOWSE Design Awards • 2010, 2011, 2012
